

Second Brain Setup Guide

A simple and powerful way to organize your ideas, documents, notes, and tasks using Tiago Forte's PARA Method.

Created by PM Researcher

PARA stands for:

- Projects: Active outcomes
- Areas: Ongoing responsibilities
- Resources: Reference material
- Archives: Completed or dormant content

Use this method to create a digital system that clears your mind and supports focused, creative work.

What is PARA?

PARA is a simple method to organize your digital life into four categories:

- Projects: Active goals with clear outcomes
- Areas: Ongoing responsibilities or roles
- Resources: Knowledge, tools, or references you may need later
- Archives: Completed or inactive materials you want to keep

Folder Setup Instructions

1. Create a main folder called 'Second Brain'
2. Inside it, create four subfolders:
 - Projects
 - Areas
 - Resources
 - Archives
3. Use these folders in cloud storage (Google Drive, Dropbox), Notion, or local files

Sample Folder Structure

Second Brain

Tips for Maintaining Your PARA System

- Review Projects weekly and move completed ones to Archives
- Check Areas monthly to update or maintain habits
- Keep Resources searchable and easy to scan
- Avoid over-tagging. PARA thrives on simplicity
